- Automatic water eliminator keeps air lines dry
- Contoured case aluminum flap folders fold our flaps
- Rotating flap tucker folds trailing inner flap
- Clear high visibility guards - electricity interlocked to stop the machine when opened
- Independently adjustable leveling footpads
- Quick changeover with rapid adjust hand cranks

MODEL CS 25 CASE SEALER

For Hot Melt Adhesive and / or Tape

The little taping machine that gives you big production benefits. Designed and manufactured to high performance standards, this tape sealer provides reliable operation for your production line tape sealing requirements. Hot melt option available. This Taping unit can run upto 25cases /min for a vast range of case sizes.

MODEL CS 50 CASE SEALER

For Hot Melt Adhesive and / or Tape

The ultimate in case sealing flexibility. Built with independent sealing modules for running either hot melt adhesive and tape. The machine can run speeds upto 50-55 cases/min.

For Continuous Production

The heavy gauge stainless steel box frame is welded and bolted for superior strength; Clear machine guards provide protection and stop the machine when opened.

Consistent Square Cases

These folding units are proven in thousands of installations to fold case flaps squarely at the score line.

Quick Size Adjustment

Change over is simple. Just adjust three manual hand cranks to the new case size, and you're back in production. Low maintenance features include sealed bearings that never need lubrication, and an air regulator/ water eliminator that keeps the minor flap tucker air line dry for smooth operation.

Quick Installation

With a compact footprint that requires little floor space, The machine has standard case infeed elevation and independently adjustable, self leveling footpads make this taper easy to fit on the packaging line.
