

# End of Line Packaging Solutions

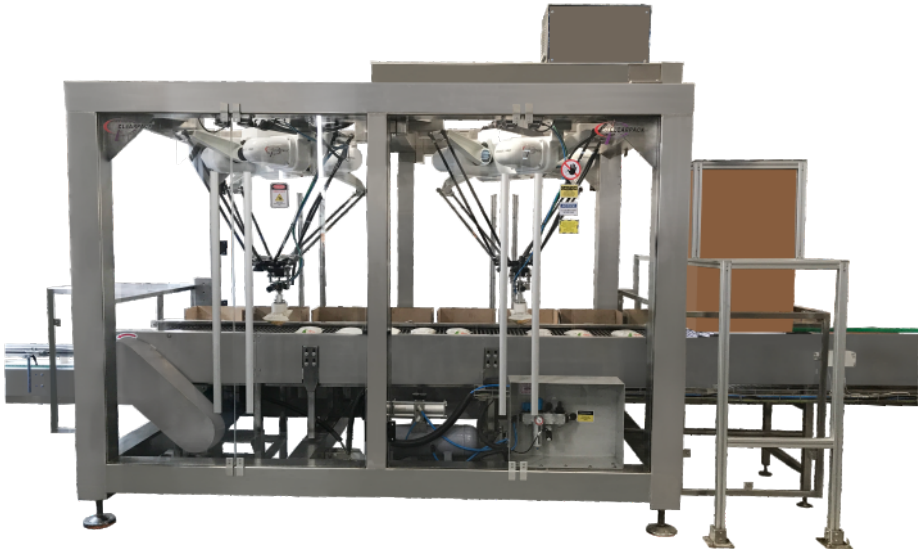

## Delta Robot Case Packer

The Delta Robot Case Packer (DCP) is ideal for high-speed top loading pick and place processes. The chosen concept with 2 parallel axis results in the fastest, most robust delta pick & place robot with multiple axis in the world.

### Features:

- Ideal for top loading of flexible products using pick and place motion onto trays, cartons or corrugated cases
- Combined with a vision system, they can also be used for random and/or mixed product flow picking
- Product tracking on conveyor belts
- Low maintenance, easy access to components
- Short cycle times with high accuracy
- Can handle payloads of up to 5KG products
- Scalable, hygienic and modular design
- Fast and easy integration with existing or new lines

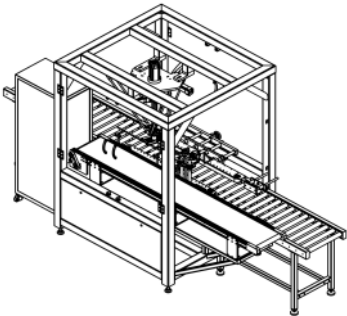

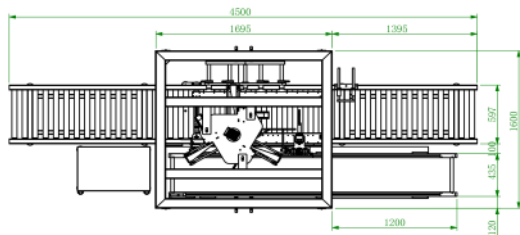

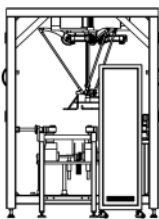

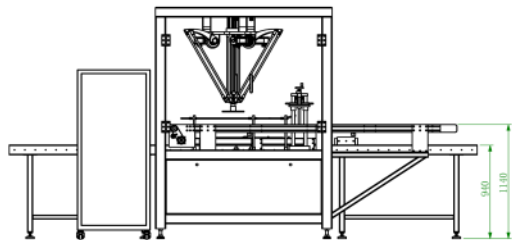

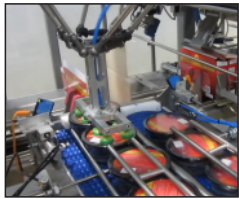

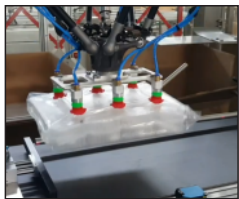

### Technical specifications:

Power supply	400 V , 3Ph+N+G
Frequency	50 Hz
Air pressure	6 bar
Nominal production	Variable*
Accepted cartons dimensions:	Min 350 x 180 x 200 H mm Max 520 x 350 x 400 H mm

\* Depends upon product shape and conditions
